## Summary

Hello there! I am 3D Animator and Rigger.

I graduated at University of South Wales in 2020 in which I directed a sting for Cardiff Animation Festival and a teaser trailer for an horror animated short that it's just waiting to be finished.

Since 2020 I worked as Animator and Rigger in VFX in various projects, from local tv series and commercials to international features.

I am open to work in other industries, such as Animation and Videogames. I am interested to learn new skills that will help me to grow professionally.

If you are interested, feel free to check my personal website for showreel and insights on projects I worked on, including conceptualization realized through animatics and storyboards of the abovementioned horror short.

## Experience

### Freelance 3D Animator

dupe vfx

Aug 2022 - Present (2 months +)

- Realized animations for previz for high profile project.
